# INTRODUCING ECO CHILL

COOL + COMFORTABLE

WITH COOLMAX® TECHNOLOGY

Powered by Reflective Apparel, EcoChill is an innovative line of hi-vis sustainable clothing that takes workwear to the next level.

Through the combination of recycling plastic into fabric and COOLMAX® technology, EcoChill keeps employees cool and visible, while also being eco-friendly.

EcoChill's specially engineered, unique four-channel polyester fiber design wicks moisture away from the skin and onto the fabric surface, where it evaporates faster than traditional moisture-wicking fabrics. This process helps to regulate body temperature.

Designed for year-round comfort, our EcoChill shirts make a great first layer for cold weather, pulling chill-inducing perspiration away from the body, and in warmer months, they keep employees cool and dry. No matter the season, EcoChill equates to wearer comfort.

PERFORMANCE  
PERFECTED  
AND REFLECTED

At Reflective Apparel, we understand that safety isn't just important on the job site, but also when you're out and about as a walker, runner, or biker. That's why we've expanded our focus beyond ANSI safety workwear and introduced WildSpark™, a line of comfortable performance wear designed with your safety in mind.

WildSpark™ apparel is stylish and comfortable, with the added benefit of discreet reflective properties that provide high visibility in low-light situations, such as on a roadside. Even better, our unique design makes it clear that you're a person, letting drivers know you're there. Being visible is critical to personal safety, and danger can strike at any time, no matter where you are. We've made it our mission to bring safety-first thinking to all aspects of our apparel, including clothing designed specifically for recreational activities.

Don't take chances with your safety. With WildSpark™ apparel, you can enjoy the peace of mind that comes with knowing you're visible.
